

RIVERSO DRAWER SYSTEM

The drawer with overlaid fronts that can be opened from both sides, for island units and room dividers

DESCRIPTION

Reach the contents of a drawer from both sides of a unit. peka's new product concept – a drawer system that can be opened from both sides – has many applications. It is right at home in kitchen islands, shop counters, living-area room dividers and laboratories alike. The system is custom manufactured, making it extremely flexible: the (inner) drawer comes in a range of depths and can be made to any width.

PRODUCT BENEFITS

- › The items stored in the drawer can be accessed from two sides/rooms/areas, thus saving time and increasing efficiency
- › The unique drawer can be opened from both sides and the front overlays the rest of the unit on the closed side, ensuring a uniform appearance
- › A push-to-open system can be fitted on one side, allowing the drawer to be opened without a handle
- › The dimensions and materials can be customised
- › The product opens the door to innovative solutions to meet specific needs
- › Applications: kitchen islands, shop counters, healthcare settings, room dividers, points of sale, beauty salons, laboratories, and more besides

TECHNICAL BENEFITS

- › The front panel is 3D-adjustable on both sides
- › The mechanism set is fully assembled in advance, enabling quicker, more efficient installation
- › The runner technology is made by Grass, guaranteeing excellent sliding properties
- › The load capacity is 40 kg
- › The system is equipped with the Softclose soft-closing device
