## Общие указания по монтажу

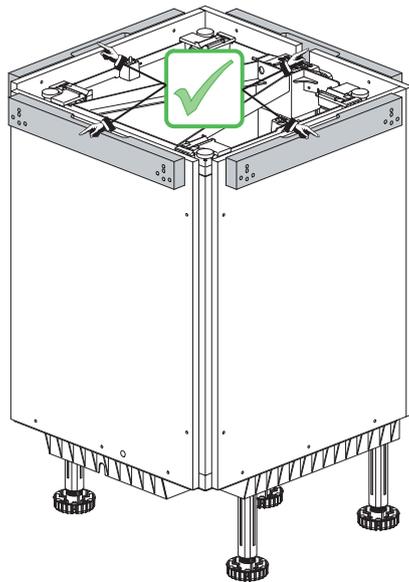

- У каждого лица, выполняющего подключение или монтаж Qanto, должен быть доступ к настоящему руководству по эксплуатации. Следуйте указаниям. Несоблюдение данных указаний может стать причиной несчастных случаев с серьезными травмами.
- Сборку должны выполнять только лица, обладающие специальными знаниями и навыками.
- При установке Qanto не в качестве углового шкафа следует оставить достаточное пространство (нишу) до края столешницы.
- Запрещается монтаж изделия, имеющего видимые повреждения.
- При монтаже Qanto следует позаботиться о достаточном пространстве для хода подъемной системы. В раздвинутом состоянии расстояние до находящихся сверху и по обеим сторонам шкафам и полкам должно составлять не менее 200 мм.
- Расстояние от Qanto до газовой плиты должно быть не менее 300 мм.
- У Qanto должен быть доступ к источнику электропитания. (напр., двойная штепсельная розетка под шкафом в цокольной зоне).
- Необходимо убедиться в отсутствии повреждений кабеля.
- Перед подключением электрического привода к домашней электросети убедитесь в соответствии напряжения в электросети параметрам входного напряжения, указанным на заводской табличке. Напряжение сети и допустимое входное напряжение должны быть идентичны. Если это не так, подключать Qanto к сети нельзя
- В случае появления из блока управления необычного шума или запаха во время эксплуатации следует немедленно прекратить подачу питания.
